Receipt of the papers filed on November 13, 2002, is acknowledged. In response

Applicant's election of Group II, claims 17-22, 58-60, 66 and 73-76 in Paper No. 15 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant has additionally submitted new claims 88-92 which depend from elected claims. Accordingly, these newly presented claims are grouped with the elected claims. Claims 20 and 60 have been canceled.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is

examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 17-19, 21, 22, 58, 59, 66, 73-76 and 88-92 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious

Independent claim 17 is directed to a layer structure usable in manufacturing an integrated circuit. Independent claim 58 is directed to a conductive material structure usable in manufacturing an integrated circuit. Independent claims 66 and 73 are directed to a workpiece.

The Ito patent discloses a (6,372,114) multilayer structure with a copper electrode buried in an insulating layer of a semiconductor device (column 1, lines 5-15. Figure 1E shows isolated inlaid conductors.

The Mayer et al patent (6,315,883) integrated circuits with a multilayer structure including damascene inlaid metallization (column 1, lines 22-30). See figure 8.

The Landau patent (6,261,433) discloses dual damascene semiconductor metallization in which a multilayer structure is formed. See figures 1A - 1E.

The Jang patent (6,350,364) discloses copper electroplated in damascene integrated circuit trenches to form conductive metal inter-connections (column 1, lines 5-10). See figures 1-3.

The products of the references have the structure of the product recited in applicant's claims. It is not apparent that the method used by applicant to form the recited structure imparts a difference in the structure itself.

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. Itabashi et al (6,300,24), Ueno (6,245,676) and Maeda (6,241,869) all disclose multilayer semiconductor metallization structures..
